#	Meeting Day	Product Owner	Software Developer	Release Manager	Scrum Master	Comment
1	2022-10-19	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon		Robert	Decided on name: SOSCI. Logo as homework Filled out Team contract Decision about rotating team meeting moderator postponed due to required input friom Mr. Riehle Team members should proactivly engage in issue assignments. The skill matrix will be used for identifiying issue assignments, but the team agreed that everybody can take up an issue on interest Standup mails will be sent flexibel and individually The team agreed on notifiying the each other in case of issues of any kind Scope of sprint: Team Contract Team Logo GitHub projects (Feature & Impediment) boards Team T-Shirt
2	2022-10-26	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Jens Wächtler	Robert	Sprint 01 deliverables reviewed. Sprint 02 issues discussed and assigned.
3	2022-11-02	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Marcel Schöckel	Robert	
4	2022-11-09	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Jan Degen	Robert	
5	2022-11-16	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Leander Tolksdorf	Robert	
6	2022-11-23	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Leon Jünemann	Robert	
7	2022-11-30	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Leon Jünemann	Robert	Mid-term due
8	2022-12-07	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Philipp Kramer	Dr. Dirk Riehle	
9	2022-12-14	Saber, Dev	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Ingrid	Robert	
10	2023-12-21	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Nicolas Kolbenschlag	COACH student	Optional team meeting
11	2023-01-11	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Nicolas Kolbenschlag	COACH student	
12	2023-01-18			Marcel Schöckel	COACH student	
13	2023-01-25			Jan Degen	COACH student	

#	Meeting Day	Product Owner	Software Developer	Release Manager	Scrum Master	Comment
14	2023-02-01			Jens Wächtler	COACH student	
15	2023-02-08			Nicolas Kolbenschlag	COACH student	Demo day!
	2023-02-15			Philipp Kramer	COACH student	Retrospective

Goals	Satisfy the client Develop a working application Each team member is learning and taking benefit from the project Maintaining a happiness index above 1
Meeting norms	12:30(Wednesday) Zoom; https://fau.zoom.us/j/67295942185
Working norms	- We help each other - Everyone feels responsible for the product - We try to keep happiness high - We always do code reviews - We create a solid CI/CD pipeline - We assign issues according to the skill matrix
Coordination norms	- We use Zoom for wednesday's team meetings, - Discord for internal communication and - GitHub for tasks and issues - We pick issues proactively and agree on assignments in the team
Communication norms	- Whenever there's **any** problem, we communicate it with the team - We interact politely and respectfully with each other - We have rotating moderators and protocol writers for each meeting - We write protocols of all meetings
Consideration norms	- When disagreeing, we use voting for decisions - We consider
Cont. improvement norms	- We do retros
Rewards	- We celebrate
Sanctions	- 1 pushup / minute

Signature	- Jens Wächtler - Leon Jünemann - Leander Tolksdorf - Nicolas Kolbenschlag - Marcel Schöckel - Jan Degen - Philipp Kramer - Ingrid Münch - Dev Darshan Kasthuri Umashankar - Saber Jelodari - Robert Balink

Product Vision	Project Mission
The objective of SOSCI is to enable users of oscilloscope a way to gain access to all the features and possibilities through a software that can be done through a hardware oscilloscope and beyond. Our vision is to create a method that would better everyday life of engineers.	To organize features of an oscilloscope and processing of information and make it possible for the user to access it through a webpage. To continuously raise the level of experience of the customer with use of current technologies and maximize the output of our customer. Using SOSCI application for displaying sensor data on the frontend.

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
Release							
	Total			66	66	29	
Sprints							
1	**Project kick-off**	Get to know eachother and documentation		0	66	0	29
2	**Project Basic setup**	Basic UI and architecture setup		15	66	7	29
3	**Data connection**	Connect frontend and backend		16	51	10	22
4	**Basic visualization**	Data visualization and docker simplification		14	35	12	12
5	**User Interface & necessary functionalities**	Adding important functionalities		21	21	0	0
6	**Mid-project release**	To have a working product with basic functionalities					
7	**Add functionalities**	Improve functionalities and its implementations					
8	**Design**	Improve UI design					
9	**Improve core functionality**						
10	**Improvements (optional sprint)**						
11	**Advanced functionalities**	Help users in a way the analogous oscilloscope cannot					
12	**Refinement of UI and functionalities**	Front end refinement and bug fixes					
13	**Preparation for demo day**	Demo slides, videos and posters					
14	**Final Project Release**	Deliverable product without major bugs					
15							
Features							
1	**Project kick-off**	Get to know eachother and documentation	Create GitHub projects for tracking issues				
			Team contracts				
			Create team logo				
			Role assignment				
2	**Project Basic setup**	Basic UI and architecture setup	Create Hello world generator	5		3	
			Create a helloworld page for front-end	5		2	
			Docker setup	5		2	
3	**Data connection**	Connect frontend and backend	Receive signal	5		5	
			Display cartesian plot	3		5	
			Home page - Basic	1		0	
			Display cartesian plot	3			
			Create UI - Zoom feature	3			
			Create UI - Scroll inside plot				

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
			Create On/off button	1			
4	**Basic visualization**	Data visualization and docker simplification	Documentation - Definition of Done				
			Signal - step function	1		1	
			Signal - cosine wave	2		1	
			Signal - sine wave	2		2	
			Simplifying Docker Configuration	1		1	
			Data signal visualization from the node server	5		5	
			Create layout draft for UI	3		2	
5	**User Interface & necessary functionalities**	Adding important functionalities	Vertical adjustment - Amplitude				
			Horizontal adjustment - Time sweep speed	5		3	
			Build process video	3		2	
			Scale factor - Horizontal and vertical				
			Amplitude indicator - for each channel	5		5	
			Vertical positioning - with change in position of zero	3		3	
			Create UI - Start and Stop button				
			Setting up CI/CD	5		3	
6	**Mid-project release**	To have a working product with basic functionalities	Setup front-end linter	2			
			Refactoring - Generator	2			
			Refactoring - Frontend	3			
			Front end tests	3			
7	**Add functionalities**	Improve functionalities and its implementations	Cursors	5			
			Markers				
			Signal line thickness				
			Toggle buttons - channels				
			Signal head				
8	**Design**	Improve UI design	Standardize the UI layout				
			Position indicator of plot				
9	**Improve core functionality**						
10	**Improvements (optional sprint)**						

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
11	**Advanced functionalities**	Help users in a way the analogous oscilloscope cannot	Save plot images				
12	**Refinement of UI and functionalities**	Front end refinement and bug fixes					
13	**Preparation for demo day**	Demo slides, videos and posters					
14	**Final Project Release**	Deliverable product without major bugs

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	Feature/Bug/Change has been implemented	Sprint Review completed	All required features are implemented
	Application compiles successfully	Sprint Retrospective completed	User manual is ready
	Code is documented	Pull request into Main branch merged	Technical manual is ready
	Feature/Bug/Change is tested by at least one unit or e2e test	Release candidate has been tagged	No critical bugs
	Tests have been passed without warnings (except "deprecated" warnings)	Every user story fullfills the feature DoD	Demo approved by team
	Changes have been reviewed	All issues are either closed or moved back to the Product Backlog	
	PR has been merged to dev branch	All completed issues have a real size tag	
	New dependencies have been added to bill of materials	Backlog is up to date	
	Software archticture diagram has been updated		
	All acceptance criteria are fullfilled		
	Screenshot is attached to issue
