Project 3 - Planning Document Role Assignments

#	Meeting Day	Product Owner	Software Developer	Release Manager	Scrum Master	Comment
						Decided on name: SOSCI. Logo
						as homework
						Filled out Team contract
						Decision about rotating team
						meeting moderator postponed due to required input friom Mr.
						Riehle
						Team members should proactivly
						engage in issue assignments.
						The skill matrix will be used for
						identifiying issue assignments,
						but the team agreed that
						everybody can take up an issue
						on interest
						Standup mails will be sent
						flexibel and individually
						The team agreed on notifiying the each other in case of issues of
						any kind
						Scope of sprint:
						Team Contract
						Team Logo
						GitHub projects (Feature &
			Jan, Leander, Jens, Marcel,			Impediment) boards
1	2022-10-19	Dev, Saber	Philipp, Nicolas, Ingrid, Leon		Robert	Team T-Shirt
						Sprint 01 deliverables reviewed.
2	2022 40 26	Dev, Saber	Jan, Leander, Jens, Marcel, Philipp, Nicolas, Ingrid, Leon	Jens Wächtler	Robert	Sprint 02 issues discussed and
	2022-10-20	Dev, Sabel	Jan, Leander, Jens, Marcel,	Jens wachtier	Robert	assigned.
3	2022_11_02	Dev, Saber	Philipp, Nicolas, Ingrid, Leon	Marcel Schöckel	Robert	
3	2022-11-02	Dev, Gabei	Jan, Leander, Jens, Marcel,	Walter Othocker	Robert

Project 3 - Planning Document Team Contract

Goals	Satisfy the client Develop a working application Each team member is learning and taking benefit from the project Maintaining a happiness index above 1
Meeting norms	12:30(Wednesday) Zoom; https://fau.zoom.us/j/67295942185
Working norms	- We help each other - Everyone feels responsible for the product - We try to keep happiness high - We always do code reviews - We create a solid CI/CD pipeline - We assign issues according to the skill matrix
Coordination norms	- We use Zoom for wednesday's team meetings, - Discord for internal communication and - GitHub for tasks and issues - We pick issues proactively and agree on assignments in the team
Communication norms	- Whenever there's any problem, we communicate it with the team - We interact politely and respectfully with each other - We have rotating moderators and protocol writers for each meeting - We write protocols of all meetings
Consideration norms	- When disagreeing, we use voting for decisions - We consider
Cont. improvement norms	- We do retros
Rewards	- We celebrate
Sanctions	- 1 pushup / minute

Project 3 - Planning Document Product Goal

Product Vision	Project Mission
The objective of SOSCI is to enable users of oscilloscope a way to gain access to all the features and possibilities through a software that can be done through a hardware oscilloscope and beyond. Our vision is to create a method that would better everyday life of engineers.	To organize features of an oscilloscope and processing of information and make it possible for the user to access it through a webpage. To continuously raise the level of experience of the customer with use of current technologies and maximize the output of our customer. Using SOSCI application for displaying sensor data on the frontend.

Project 3 - Planning Document Product Glossary

Term	Definition
SOSCI	Project name, Software Oscilloscope
Frontend	The svelte frontend of SOSCI
Sample	A number representing a voltage
Package	A UDP package of 10 samples
Plot	A continuous line that gets drawn from a stream of samples
Amplitude	A number that scales the plot of a sample
Offset	A number that offsets the plot of a channel vertically
Time sweep	A number that defines what time a plot needs to cross a certain horizontal division

Mid-Project Release plan

Project 3 - Planning Document Definition of Done

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	Feature/Bug/Change has been implemented	Sprint Review completed	All required features are implemented
	Application compiles successfully	Sprint Retrospective completed	User manual is ready
	Code is documented	Pull request into Main branch merged	Technical manual is ready
	Feature/Bug/Change is tested by at least one unit or e2e test	Release candidate has been tagged	No critical bugs
	Tests have been passed without warnings (except "deprecated" warnings)	Every user story fullfills the feature DoD	Demo approved by team
	Changes have been reviewed	All issues are either closed or moved back to the Product Backlog	
	PR has been merged to dev branch	All completed issues have a real size tag	
	New dependencies have been added to bill of materials	Backlog is up to date	
	Software archticture diagram has been updated		
	All acceptance criteria are fullfilled		
	Screenshot is attached to issue
